Primary ICT and PE

This innovative workshop will focus on the use of mobile devices and apps to complement your existing programs. The use of mobile devices can allow you to explore further key concepts and strategies to increase your engagement, confidence and knowledge when teaching movement skills in physical education. ICT can provide the opportunity for the student to collaborate with others, receive and provide immediate feedback and develop higher order thinking skills. The use of apps to support your planning, administration and evaluation of teaching will be explored.
